EDUCATION & WORK

PhD: Causal Discovery in Real-world applications

FSU Jena 📅 Mai. 2021 – Present 📍 Jena, Germany

- PhD project in cooperation with the CVG Jena and iDiv
- Focus on the development of Causal Discovery algorithms that are robust in real-world applications
- Construction of large-scale benchmarks
- With applications in biodiversity research

Research project: Remote sensing for large infrastructure monitoring

FSU Jena 📅 Mai. 2022 – Present 📍 Jena, Germany

- Remote sensing for infrastructure monitoring

Software Engineer at EasyMedBox

EasyMedBox 📅 Januar. 2022 – 2023 📍 Remote

- Product development during the founding phase

Software Engineer at Bliro

bliro.io 📅 April. 2022 – 2023 📍 Remote

- Product development during the founding phase

Freelancer (self-employed)

steinML 📅 Sep. 2020 – Now 📍 Jena, Germany

- Currently self-employed as machine learning consultant

Master of Science: Machine Learning & Data Analysis

ITMO University 📅 2018 – 2020 📍 St. Petersburg, Russia

- Full-time study with a specialization in Machine Learning
- Independent research publications on Reinforcement Learning
- Awarded with a "best thesis" award by ITMO University

Bachelor of Arts: Philosophy & Economics

University of Bayreuth 📅 2014 – 2018 📍 Bayreuth, Germany

- Full-time study with a focus on Game and Decision Theory
- Internship at Vairnana as a frontend developer

Selected first author publications:

"CausalRivers – Scaling up benchmarking of causal discovery for real-world time-series", ICLR Spotlight 2025
"Enhanced stability of grassland soil temperature by plant diversity", Nature Geoscience 2024

ABOUT ME

I am an ambitious **Machine Learning Scientist** with a special interest in Time Series Processing, Causal Inference, and Deep Learning. I focus on leveraging these methods to answer complex questions in real-world applications.

STRENGTHS

Machine Learning Deep Learning
Time series processing Causal Inference
Interdisciplinarity Public speaking
Technical writing LaTeX Python
Pytorch/Lightning/Hydra/Docker/Slurm
Gen AI/LLMs/Foundation Models
